PROFESSIONAL SUMMARY

Full Stack JavaScript Developer with 1,000+ hours of hands-on training through The Odin Project and freeCodeCamp. Builds responsive web and mobile applications with React, Node.js, MongoDB, REST APIs, and real-time features. Brings 4+ years of operations leadership and digital systems management experience, with a focus on solving business problems through practical, user-centered code.

EDUCATION

The Odin Project Full Stack JavaScript Path	October 2024 - January 2025
freeCodeCamp JavaScript Algorithms & Data Structures	February 2023 - September 2024

EXPERIENCE

Frontend Developer / Open Source Contributor Pamoja Community Platform - Developing a real-time MERN stack platform connecting 1,000+ developers, recruiters, and tech leaders across Kenya through live chat, job boards, and instant CV review features. - Implemented 10+ React components with Redux state management and Socket.io + MongoDB data streams to power responsive, real-time platform features. - Delivered accessible, responsive UI across 3+ Agile sprints, incorporating peer code reviews and performance optimization cycles to improve usability and consistency.	December 2024 - Present
React Developer / Open Source Contributor SpaceYaTech - Improved a production React open-source project by strengthening Git workflows and branching standards across a distributed team of 5+ contributors. - Reviewed pull requests, aligned code changes with open-source community guidelines, and strengthened remote collaboration practices during a 4-month contribution period.	September 2024 - December 2024
Operations & Customer Relations Manager BulkBox Ltd - Oversaw daily e-commerce operations for 5,000+ SKUs using ERPNext and Zoho, gaining hands-on experience with workflow automation, software systems, and large-scale data management. - Led a fulfillment team of 4+, coordinating the full order lifecycle from client engagement to last-mile delivery and supporting consistent day-to-day service operations.	January 2021 - August 2025

PROJECTS

Job Notifier Manager github.com/ayuboketch/Job-Notifer-Manager Built a full-stack mobile app with authentication, database schema design, API integration, and production debugging across core user and notification workflows.	
Developer Portfolio ayubs-portfoliovercel.app Built a responsive single-page portfolio with SEO optimization and Vercel deployment, improving page structure, mobile usability, and performance across key landing sections.	

CERTIFICATION

Back End Development & APIs freeCodeCamp	April 2025 - April 2025
Software Quality Assurance freeCodeCamp	April 2025 - April 2025
Relational Database freeCodeCamp	April 2025 - April 2025
Front End Development Libraries freeCodeCamp	February 2025 - February 2025
JavaScript Algorithms & Data Structures freeCodeCamp	May 2025 - May 2025
